SUMMARY

Software engineer shipping production full-stack systems: Next.js, TypeScript, React, PostgreSQL, REST APIs, Amazon Web Services (AWS), Terraform, CI/CD, and retail AI (computer vision, LLMs).

WORK EXPERIENCE

AI Research Analyst Jan 2026 – Present
Furnitureland South, Inc. *Jamestown, NC*

- Own production ClearView (Next.js, TypeScript, PostgreSQL/RDS): scan-first inventory plus shop-request operations used by 70+ staff across ~1.3M serials / 200k+ products.
- Cut grouped browse ~11s → ~150ms–1s via materialized views, query redesign, and statement-timeout guardrails; 15-minute ERP delta sync on ~5GB / ~23 years of history.
- Shipped shop-request queue/detail with attachments, write-back, and role-gated access; catalog on RDS, ops queues on live NetSuite so staff are not waiting on lag.
- Hosted on Amazon ECS/Fargate behind internal + public ALBs with AWS WAF and Microsoft Entra ID (SSO); own staging→prod CI/CD (Bitbucket Pipelines, OIDC/ECR, Terraform/SSM).
- Built production Zendesk routing (custom round robin, dedicated-agent paths, feature-flagged rollouts) that has processed 9,928 unique tickets.

Jr. AI Research Analyst Aug 2025 – Jan 2026
Furnitureland South, Inc. *Jamestown, NC*

- Shipped AWS async pipelines (API Gateway → Lambda → S3 → SQS → ECS/Fargate) for speech-to-text write-back and delayed chat timeout handling.
- Delivered ERP ↔ support-platform sync and reporting Suitelets/SQL with logging, retries, and dry-run/live controls; wrote specs and shipped behind env flags.

Information Technology Intern May 2025 – Aug 2025
Furnitureland South, Inc. *Jamestown, NC*

- Built core of SofaScope visual search: CLIP embedding pipeline, FAISS nearest-neighbor search, and React UI from research prototype to production-facing service.

PROJECTS

SofaScope — AI visual product search (Python, FastAPI, CLIP, FAISS, Docker)
Similarity search ~15s → <500ms (~95%); Dockerized embedding + query path.

SEC 8-K Breach Dashboard — React, Node.js, Express, MongoDB, WebSocket · github.com/cwarre33/BreachDashboard
Real-time SEC cybersecurity filings with live updates and AI-assisted summaries.

AutoTrader — Python, Docker · github.com/cwarre33/AutoTrader
Paper-trading bot: volume scan, RSI + LLM news sentiment, automated paper execution.

SKILLS

Languages: Python, Java, JavaScript, TypeScript, SQL, HTML/CSS, C/C++ (coursework)
Systems: Node.js, FastAPI, React, Next.js, Spring, PostgreSQL, Docker, REST APIs, Git, Amazon Web Services (AWS: Lambda, S3, SQS, ECS/Fargate, RDS, ALB, WAF), Terraform, CI/CD, NetSuite, Zendesk, Microsoft Entra ID
Engineering: Full-stack development, performance optimization, testing, SSO/RBAC, async jobs, API integrations

EDUCATION

University of North Carolina at Charlotte — B.S. Computer Science Dec 2025 · GPA **3.5**
Chancellor's List · Dean's List · Coursework: Software Engineering, Database Design, Algorithms, Operating Systems, Networking

Certifications: AWS Academy Cloud Foundations · Introduction to LangGraph (LangChain) · Data & Programming Foundations for AI
