EDUCATION

University of North Carolina at Charlotte - B.S. Computer Science | Dec 2025 | GPA 3.5

Chancellor's List | Dean's List | Coursework: Software Engineering, Database Design, Algorithms, Operating Systems, Networking

EXPERIENCE

AI Research Analyst - Furnitureland South, Inc. | Jamestown, NC | Jan 2026 - Present

- Own production full-stack delivery for an inventory platform (Next.js, TypeScript, PostgreSQL/RDS): search, item detail, history, exports, and role-based access used by sales operations.
- Cut filtered-search timeouts/latency via materialized snapshots, browse matviews, query redesign (removed per-row lookups), and statement-timeout guardrails under concurrent load.
- Stood up shared AWS RDS (~5 GB operational dataset) and a 15-minute delta-sync job so engineers share one source of truth instead of drifting local databases.
- Shipped Microsoft Entra ID SSO with session roles, API/UI RBAC gates, and verification tests; added Bitbucket CI (typecheck, ESLint, merge protection).
- Built/hardened production Node.js routing automation (caps, dedicated-agent paths, feature-flagged rollouts, JSONL telemetry) with offline unit tests and live validation.

Jr. AI Research Analyst - Furnitureland South, Inc. | Aug 2025 - Jan 2026

- Designed and shipped AWS async pipelines (API Gateway -> Lambda -> S3 -> SQS -> ECS/Fargate) for speech-to-text write-back and delayed timeout handling; benchmarked models for cost/latency.
- Delivered enterprise integration jobs (ERP <-> support-platform sync, reporting Suitelets/SQL) with logging, retries, and dry-run/live controls.
- Wrote specs, system diagrams, and acceptance criteria; shipped behind env flags without disrupting live traffic.

Information Technology Intern - Furnitureland South, Inc. | May 2025 - Aug 2025

- Built core of SofaScope visual search: image embedding pipeline, FAISS nearest-neighbor search, and React UI; iterated from research prototype to production-facing service.

PROJECTS

SofaScope - AI visual product search (Python, FastAPI, CLIP, FAISS, Docker) | sofascope.furniturelandsouth.com

- Optimized similarity search latency ~15s -> <500ms (~95%); Dockerized microservices for embedding + query path.

SEC 8-K Breach Dashboard - React, Node.js, Express, MongoDB, WebSocket | github.com/cwarre33/BreachDashboard

- Real-time dashboard for SEC cybersecurity filings with live WebSocket updates and AI-assisted summaries.

Dining Review API - Java, Spring, JPA | github.com/cwarre33/DiningReviewApplication

- RESTful API for submitting and querying dining reviews with Spring Data persistence.

AutoTrader - Python, Docker | github.com/cwarre33/AutoTrader

- Paper-trading bot: volume scan, RSI + LLM news sentiment, automated paper execution.

SKILLS

Languages: Python, Java, JavaScript/TypeScript, SQL, C/C++ (coursework)

Systems: Node.js, FastAPI, React, Next.js, Spring, PostgreSQL, Docker, AWS (Lambda, S3, SQS, ECS/Fargate, RDS)

Engineering: Performance optimization, debugging, unit/integration tests, CI pipelines, SSO/RBAC, async jobs, API integrations, specs & diagrams

CERTIFICATIONS

AWS Academy Cloud Foundations | Introduction to LangGraph (LangChain) | Data & Programming Foundations for AI (Codecademy)
